

Comprehensive Proteomic Analysis of Kidney Stone Matrix

Manoj Monga (PI), Benjamin K. Canales, Lorraine Anderson, LeeAnn Higgins, Joel Slaton, Ken Roberts, Nathan Liu

Department of Urologic Surgery, University of Minnesota

- **Bruker-AXS**
 - ◆ X-ray microdiffractometer
 - ◆ Used to characterize human kidney stones by mineral type
- **Once characterized, stones underwent protein extraction followed by tandem mass spectroscopy**
- **Comprehensive Proteomic Analysis of Kidney Stone Matrix, abstract for American Urologic Association Annual Meeting, May 2007.**
